

NorStone
design

Lifestyle and design in the AV world.

While electronic devices are becoming more and more aesthetically appealing... While home interior decoration and home fashion are becoming commodity for everyone... It is still hard to find AV furniture that combine functionality and beauty.

NorStone Design creates a bridge between contemporary home design and AV electronics.

Whatever your style is, whatever the kind of electronics you need to house, NorStone Design has a solution for you. The solution that will safely hold your Hi-tech flat screen TV, your vintage Hi-Fi amp. or your favourite turntable without disfiguring your decor... NorStone Design, thanks to its fashionable approach to the Hi-Fi and video world, make your AV devices part of your home.

It will help to make the place you live a space you love, surrounding yourself with your favourite music and movie «makers», harmoniously laid on a NorStone Design piece.

NorStone Design expresses the link between high technology and aesthetic, between commodity and lifestyle.

Because our common mission is also to make modern design furniture available to more people, NorStone Design products are affordable too.

Table of contents

Thanks to its optimized architecture, Più is the perfect match for high-end audio applications. Its MDF structure is a testimony of stability and lack of resonance allowing thereby excellent listening conditions. Its open sides and back ensure an easy access to the connectors and enough airflow to guarantee a perfect cooling of the electronics. Più ideally hold your full Hi-Fi equipment, while the top shelf may welcome your turntable.

Choose the full black version, made of black lacquered glass shelves and piano black lacquer finish, and you will reveal the subtle geometry of this cubic piece. Mix black lacquered glass shelves and light oak finish for a distinctively elegant look that is made to last.

Più

The design concept behind Più is definitely to offer pure shapes that will never go out of fashion. The timeless elegance of the outer lines makes Più the matching piece for Hi-Fi and design addicts. Enjoy your music passion in style.

Più

This AV version of the Più sets the benchmark for elegance, purity and versatility. Like all the great design, the simplicity and clean lines of Più AV mean it will continue to look up-to-date for years. It allows you to easily and inexpensively create a unique stylish AV combination.

Più AV revamps your all-beautiful flat screen TV and emphasises your Home Theatre electronics. As the Più, the AV version is available in all-black colour (black lacquered glass & piano black lacquer finish) and in black / light oak (black lacquered glass & light oak finish).

Ensuring our products always remain a reflection of modern life, our designers work to spot new and emerging trends. After a long period of minimalism, people are today welcoming warmth and personality back in their homes: A way to stand out from the crowd and to tell about their own personal story.

AV

That is how Più AV has been released in an exotic dark wood wenge finish. Mixed with white lacquered glass shelves, this unique piece cannot be so-called a «TV stand» anymore. It is creating, combined with high-tech electronics, a true piece of art.

Because beauty is not enough, Più AV gathers all the specificities that should be owned by an AV piece of furniture. The large top shelf can hold any plasma or LCD TV up to 176.3 lbs (80 kg). The large inner shelves are deep enough to welcome any AV amplifier. Fed up with the cables snarls, laid on the floor? Più AV features a large wire path to floor that will hide the unsightly cables.

Century

NEW

Black and white are everlasting classics. They are the perfect backdrop for any other colour, and any style. The combination of both is becoming today increasingly popular in the home design. Black and white are so-called «non-colours» and will never break harmonies in your home decor.

Century is also a «crossbreeding» of texture and materials: The warmth of a leather finish and the purity of the lacquered glass shelves make it a real «must-have» for design addicts.

Century remains anyhow a product for AV fanatics. It combines again all the specificities that ensure the good performance of your AV devices. TVs and Home Theatre products feel right in its large and deep shelves: The unnoticeable back path to floor ensures a clean management of the cables.

Epur 4

Epur line has been designed to combine lightness, purity, transparency and functionality. Because people are different and have desire to be individuals, Epur offers a full versatility in terms of home interior integration. May your home be tagged by splash of colours or subtlety decorated in the harmony of a unique shade: Epur can blend into any place. The classic combination of crystal glass shelves and the satin finish of the tubular structure is so effectively simple that it makes it easy to home integrate.

Epur 4 is designed to hold your complete Hi-Fi system. The top shelf can ideally welcome your turntable. It can also hold a complete Home Theatre system with a rather small size TV set.

The specific design of Epur 3 and Epur 4 provides an easy access to the electronics. Largely opened on all sides, Epur ensures an optimized cooling of your AV equipment.

Epur feet are equipped with invisible wheels that make it easy to move. The removable cable management system ensures a clean installation without visible wires.

This AV piece can hold your flat screen TV up to 176.3 lbs (80 kg), a complete Home Theatre system (including AV amplifier, DVD player, multimedia centre...) as well as the central speaker of your 5.1 sound system.

Epur

12

For technical specification, see page 31

Epur C

The design concept behind Epur C is clear: Convenience, simplicity and absolute lightness for those who want to make their Home Theatre invisible while not in use.

This corner piece can be positioned almost everywhere, even in the smallest rooms.

For technical specification, see page 30

13

This versatile little piece can easily welcome a small AV system, including a flat screen TV or a CRT TV up to 121.2 lbs (55 kg). The adjustable central glass shelf makes it really convenient to house the thickest electronics. A small and efficient piece that surely fits in the smallest flats or in the kids' bedroom.

Epur X

Bergen

AV

14

For technical specification, see page 31

Bergen line has elegant and stylish shapes. It has been fully designed to enhance the audio and video performance of your installation. The AV version, is wide enough to hold a sophisticated Hi-Fi or Home Theatre system with many devices such as AV amplifiers, DVD players, VCRs,... and a flat TV on the top shelf.

Each Bergen's shelf, is mounted on spikes and ensures a perfect vibrations decoupling. Based on a tripod structure, each shelf is totally stable. Tempered glass shelves are mounted on shock-absorbing and skidproof pads.

Bergen's modular structure allows a lot of combinations.

The counter spikes feature as well a skidproof shock absorber to protect the delicate surfaces (wooden floors).

Bergen

Trio line is beautifully designed and affordably priced. It is made of transparent glass, strong metal and warm light oak finish. Once again, the purpose is to express a real trend for blend of textures, colours and materials.

Trio

Trio

This contemporary piece pictures a real taste for a relaxed lifestyle: For those who love their surroundings lively and spontaneous. For those who will enjoy as much a warm Home Cinema showing with friends and family, or a peaceful musical moment comfortably seated on a sofa.

The standard piece is perfect to hold a complete Hi-Fi system, when the AV piece is large enough to welcome a plasma or LCD TV, a central speaker and an entire Home Theatre system.

Present

Wenge

Present combines the purity of glass and the strength of a sturdy design. It can hold a TV set, a plasma or a LCD TV up to 176.3 lbs (80 kg). Because our straight-line care is to make our AV furnishings part of your home, we made the Present available in 3 different colours.

Silver

Oak

Always using a metallic structure and frosted glass shelves, Present front panel can feature a daring silver finish, a warm light oak or an exotic dark wood Wenge finish. And it is so affordable, that you may choose the 3 of them to create separate surroundings in different rooms!

Ekär 4 provides a fashion and convenient housing for audio, video and TV set up to 176.3 lbs (80 kg). It can also hold a fully Hi-Fi oriented system with a turntable device on the top shelf.

Ekär 4

Perfectly versatile and compact, Ekär 3 is a very sturdy AV furniture designed to hold a complete Home Theatre system (including electronic devices, a central speaker and even a video display: TV set, plasma or LCD TV up to 176.3 lbs (80 kg).

Ekär

21

Epsis

2

22

For technical specification, see page 28

Largely inspired by the Scandinavian style, Epsis 2 is a strong and efficient Audio/Video furniture that provides space for up to 6 devices.

The top shelf can also be used to hold a TV set, a plasma or a LCD TV up to 187.3 lbs (85 kg). The purity and simplicity of its shapes make it easy to integrate.

NEW

24

Mask

This revolutionary concept adapts the AV housing to the specific needs of the user, to ease his life. NorStone designers came to a simple and practical conclusion, based on the plasma and LCD business analyse.

While people buy a flat screen because «it looks so fancy and classy once hung on the wall», most of the installations end up in a table set up once back home... Why? Because installing a 66.1 lbs (30 kg) TV on the wall is tough! That's how the concept of Mask is born.

This flat screen wall mounting concept is quick, easy and you can install it anywhere, no matter if you own your home in the country side or if you rent your flat in one of those expensive big cities. Your flat screen TV is wall mounted, you can easily hide the cables and use the two glass shelves to hold your electronics.

For the first time, say «good bye» to the tiring and complicated wall mounting installation, forget about drilling the walls of your living room to hide the unsightly cables... And enjoy the Mask.

Walm

NorStone mount

Walm T-3250

Walm 3250

Walm aesthetically supports any plasma screen from 32" to 50".

While Walm 3250 is a fixed version, the Walm T-3250 offers the flexibility of a tilt move.

Because a flat screen TV becomes a piece of art once wall mounted, NorStone Mount offers a line of truly universal plasma and LCD brackets. All NorStone Mount brackets combine a great resistance to loading, a unique ease of use, and a reinforced safety (featuring locking systems).

Curve

NEW

For technical specification, see page 33

Curve 75100

Curve 75101

Curve 75102

NEW

Curve is a LCD bracket that is fully compatible with all VESA 75 and VESA 100 LCD flat screens.

Curve 75100 standard version offers tilt and swivel moves possibility. Curve 75101 and Curve 75102 feature extension arms for an unparalleled viewing angle convenience.

Speaker stands

Still focused on life style and home integration of the audio and video components, NorStone Design benefits also from a long experience in the acoustic industry. This helps our designers to understand all the requirements of a quality Hi-Fi or Home Theatre installation that should immerse the listener in the intensity of music, in the realism of a cinematic experience. This goes through a perfect installation of the speakers that must be positioned at the right place in order to create a tri-dimensional sound image. Based on this expertise, NorStone Design has developed a full range of speaker stands, for satellite and bookshelf speakers of any kind.

The Stylum line of speaker stands has been designed by audio specialists for audio fanatics. Their common structure is really functional. The adjustable spikes, located on both the top and bottom plates, ensure ideal adjustment for a perfect stability of the installation.

26

This satellite speaker stand has a sleek contemporary style and a hidden wire path to floor, which makes it really easy to integrate in any home environment.

It is height adjustable and its solid cast iron base ensures an unparalleled stability. Finn is delivered with several mounting systems to make sure that it fits to your speakers' specificities.

The antivibration system guarantees the best performance of your speakers. You can also add sand inside the main tube to cancel any resonance.

The quality approach

NorStone Design never forgets that AV furnishings have to be thought and developed in order to satisfy the high quality criteria of the Hi-Fi and Home Theatre world. Following the essence of the brand, our products care about people and technology.

In this respect our products have to be made of specific materials, which can offer strength, stability, and an absolute guarantee against resonance.

From a practical point of view, an AV piece has to be easy to install and maintain. It should help to ease users' lives by featuring specific characteristics; Such as the wire path to floor.

The architecture must take into account specific requirements in terms of thermal resistance (cooling of the electronics), strength (loading resistance) and safety.

That is why every material and every component of a NorStone Design product is resulting from a careful selection.

NorStone Design contemporary furniture are constructed of combinations of three different materials: Steel, MDF and Glass.

STEEL
The steel structures are covered with a high impact, scratch resistant powder-coated finish. This ensures that the finish quality will last for long.

MDF
Medium-density fibreboard (MDF) is an engineered wood product formed by breaking down softwood into wood fibres, combining it with wax and resin, and forming panels by applying high temperature and pressure.

The steel architecture of our products is also a guarantee of loading resistance and safety, which remain major points for home products.

MDF is a good material for cabinetry, particularly including acoustic enclosures such as loudspeakers or subwoofers due to its high grade sound properties.

TEMPERED GLASS
Tempered glass is a type of safety glass that has increased strength and will usually shatter in small, square pieces when broken (ensuring minimised risk for users). It is used when strength, thermal resistance and safety are important considerations.
