

VIABLUE EP-7 SILVER RJ-45 CAT6A 1,5M

Kód:	VBEP715M
Výrobce:	VIABLUE
Záruční doba:	24 měsíců

Tento Ethernet kabel od německé značky ViaBlue EP-7 SILVER RJ-45 je high-end provedení LAN kabelu Cat6a pro vysoké datové toky s excelentním stíněním a vodivostí.

Vodiče jsou vyrobeny z postříbřené OFC mědi zakončené zlacenými koncovkami T6s RJ-45.

Product description:

Silver-plated strands made of pure OFC copper

100% shield coverage by a total of 5 layers (braided shield and 4 aluminium foil shields). This prevents any distortion and jitter no matter which frequency such as mobile phone signals

Soft banding

Satin mat sheath: highly flexible and ultra resistant

ViaBlue? EP-7 Silver network cables are fitted with ViaBlue? T6s RJ-45 LAN plugs and ViaBlue? Cobra braided sleeves.

Technical specifications:

Silver-plated OFC copper strands

100% shield coverage: 1 braided shield, 4 aluminium foil shields

Insulation: Highly flexible and extremely resistant sheath

Outer diameter of cable incl. braided sleeve: 9.5 mm

AWG 26/7

Bending radius 4 x ?

Operating capacity, nominal 45 nF / km

Relative propagation velocity, approx. 0.76 C

Characteristic impedance 1-100 MHz = 100 +/- 15 ohms

Characteristic impedance = 100-250 MHz = 100 +/- 22 ohms

Characteristic impedance 250-600 MHz = 100 +/- 25 ohms

Shield attenuation up to 600 MHz > 60 dB

T6s RJ-45 plug | gold plated

Cat6A
